Why Not Get The Skating Rink In Operation?

Suggested That Town Council Make a Move

Now that the weather is getting more wintry many are asking why come is not being left at the local skating rink going.

Ever since the rink was in operation the Redcliff has been in operation here. Redcliff has been very fortunate in having no serious accidents which have been in other places where rinks and lakes are used for skating. This year however there has been considerable skating on the river and although the ice appears to be now quite safe it is no guarantee that some fine time will not happen any time. For this reason some special effort should be made to get the skating rink going.

In talking over this matter with some local citizens the opinion appears to be that, since we have no service organization in town, that the Town Council should take steps to get the rink going. It is felt that the town staff could handle the position much more economically and satisfactorily than any other organization and that is why the initial expense is not so great.

The facilities we already have for a rink, it seems to be, are not so bad. It is not only appears to take the necessary move.

Jan. 2nd

Redcliff Young Man Married in Seattle

Hicks - Anderson

A wedding of interest to Redcliff citizens took place in Seattle on Saturday, Dec. 26th when Chas. Leonard Hicks of Calgary was married to Miss Mary Kay Anderson, of Lethbridge.

The young couple spent their honeymoon in Mexico City. They are expected to return on Jan. 20th to Calgary where they will reside in future.

The groom is well known in Redcliff having spent his school days at his home here.

Local Bible Society Has Annual Canvass

Officers Extend Thanks To Ladies For Help

Once again the officers of the Redcliff branch of the Canadian Bible Society, extend their thanks to the Redcliff residents, who contributed to this fund in the annual canvass which has just been completed. Special thanks are accorded to the ladies who undertook the canvass, namely:

Miss J. Straton	\$4.45
Miss Evans and	
Broughton	2.96
Miss Ruth Pow	5.35
Miss C. Newham	2.76
Miss E. Leppard	2.20
Miss E. W. Cann	7.14

Total \$34.76
This has been forwarded to the District Secretary Rev. A. A. Gyle at the Bible House Calgary.

Contributed by Emma W. Ann Secretary Treasurer for the Redcliff branch of C.B.S. Dec. 27th 1935.

Wheighman was re-elected of the Methodist Church.

Gordon Memorial Y.P.S. Entertain Hat Group

Visitors Left on the Midnight Train After Pleasant Night

A most enjoyable social time was spent in Gordon Memorial School room on Monday evening when the members of the Y.P.S. of Westminster, Medicine Hat were guests of Gordon Memorial Y.P.S.

The fifty present entered with zest into the contests, games, skits, sing songs, a parade and reports on the past year's activities of both societies.

After refreshments the compliments of the season were extended, and the guests who had come by car, were escorted by their hosts to the C.P.R. depot where the 12:40 train kindly stopped and they boded it for Medicine Hat.

Premier Aberhart to Balance The Budget

Will Act As Reference In Merchandising

In an interview in Vancouver while on a holiday, Premier Aberhart stated: "The first job on our hands is to balance the budget. I am jealous of Alberta's credit. I don't want any person to feel he can not at money into Alberta without being assured he will get it out."

We will then get the reduction of mortgage interest. In regard to merchandising the government would, as we wish of the wholesalers and retailers themselves, act as a referee in deciding various problems. That was one of the functions of Social Credit, acting as an umpire rather than a dictator, to increase the turnover of goods, not selling but to clear or flow, at a sacrifice in order to lure the consumer into the store to try him on another side.

The instructions from the general's department machines are after Dec. 1st.

Plan Changes In The Alberta School System

Will Group Rural Schools Into Larger Divisions

Sweeping changes in Alberta's rural school system are proposed in a plan issued by authority of Premier Aberhart who is Minister of Education, and distributed to all Social Credit members of the house for consideration before it is passed.

The plan involves the grouping of rural schools into 43 or 45 divisions, or larger units, which would be administered by divisional boards of five directors, elected by the ratepayers.

Under this scheme the 3,245 rural school districts in the province, which have local boards, would not be dismantled but the ratepayers instead of electing these "local" boards for the future, would name advisory committees.

These committees would act as trustees of school property, arrange for extra services, beyond the minimum provided by the divisional board, and other duties.

The divisional board would have charge of operating and planning of schools, engaging and paying of teachers, and requisitioning of municipal council for funds, just as city school boards do at present.

Two Hockey Games For This Week-end

Brandon and Blainville Will Play The Monarchs

Two hockey matches will be in Medicine Hat this week-end. The first will be played on Friday evening commencing at 8:30 when the C.P.R. senior of Brandon, will cross sticks with the Monarchs.

On Saturday evening the Blainville Bear Cats will play the Monarchs in a league fixture. This game is called at 8:15.

"The year 1936 will be one of the greatest in history," said Premier Aberhart in his New Year's address to the people of Alberta.

An effort is being made by the provincial government to put a stop to the migration of families from towns to the cities and from rural districts to the towns. A committee will be appointed to investigate such cases.

Local Social Credit Had Successful Night

Coveted Prize Was Won By Mrs. A. J. Learmonth

A large and jolly crowd assembled at the I.O.O.F. Hall last Tuesday evening for the whist drive and dance put on by the auspices of the local Social Credit group.

Keen competition existed in the whist drive the first prize, which was won by Mr. C. Evans and Mrs. L. Morton. The association went to Mrs. Oakland.

The prize for the spot dance was won by Mrs. C. Benjamin and Mr. McGilchrist.

During the evening the drawing was made for the excellent plaque donated by Mr. T. Todd. This was won by Mrs. A. J. Learmonth.

Refreshments were served at midnight and splendid music was provided for the dancing.

The evening's entertainment was declared by all present as a most successful event to bring in the New Year.

Enforcement of Act Not to Discriminate

So Says Provincial Secretary Over The Radio

In his broadcast over the radio last Sunday from the Proletarian Bill Institute, Hon. E. C. Manning said:

Precautions would be taken to see that proposed codes and regulations under the trades and industry act did not discriminate against either producer or distributor or consumer. This was part of the government plan to take immediate steps to assist the people of the province in the interval before Social Credit could be brought into effect, he stated.

In addition there was the visit of Major C. H. Douglas, Scottish engineer, who originated social credit theories, to advise the government preparing social credit legislation, Mr. Manning stated.

Officers of Quarry Lodge Were Installed

At Joint Meeting in Medicine Hat Last Friday

At a joint installation meeting held in the Mackie Hall Medicine Hat last Friday afternoon the following officers for Quarry Lodge for 1936 were installed: W. M. - A. E. Sanderson; I. P. M. - C. T. Hall; S. W. - J. Kiering; J. Warden - A. E. Ward; Treas. - A. N. Collard; Sec. - J. R. W. Cann; S. D. - J. Lakay; J. D. - A. A. Maskell; Chap. - Rev. H. S. Hammond; S. B. - J. Hitchen; J. S. - E. T. Cooke; Reg. - H. G. Sheehy; D. of C. - G. H. Worts; Org. - H. C. Corry; Tyler - A. J. Learmonth.

C. A. Magrath, at one time member of the federal house for this constituency has resigned his position as chairman of the International Joint Commission. It is rumored the vacancy will be filled by Hon. Chas. Stewart former premier of this province.

Situation in Europe Now Less Threatening

France and Britain in Accord In Case Emergency

The situation in Europe is now much less tense than it was a few weeks ago.

Any hopes premier Mussolini may have cherished for the success of a sudden attack on the British fleet in the Mediterranean or on Malta have been dispelled by the news that Britain and France have completed their plans for defensive action in sea in such a contingency.

Military, naval and air chiefs of the two countries, according to the Times' Paris correspondent, have been in close consultation with the premier. France has made it known that any sudden offensive by Italy will find France and Britain ready to meet it.

LINDBERGH'S MOVE Recalls "MAYFLOWER"

Worried by threats of more kidnapping and the unfortunate accidents accompanying the Lindbergh case, Col. Lindbergh and his family have moved to England where they will reside in future.

In its welcome to the Lindbergh family's arrival in England the Daily Express, recalling the "MAYFLOWER" which sailed from America on the Mayflower 15 years ago, said:

"Now, in bitter shame, America sees Lindbergh, her greatest son sail back to England with his Pilgrim child to escape violence."

Mr. Joseph Freedman, at one time in business in Redcliff but now of Medicine Hat, is retiring and with his wife is moving to California.

The ringing of bells and the blowing of whistles in the local factories ushered in the new year at midnight on the eve of 1936. This was the signal for those who were awake to extend the New Year's greetings to friends.

Vital Statistics for this district, which includes Medicine Hat, Dunmore and Redcliff, show there has been a big increase in marriages during the last four months. This is taken as an indication that conditions are improving.

The federal parliament is called to meet on February 6th. It is expected to be one of the most important sessions for several years. On this occasion the senate will have full membership with 43 Conservatives and 33 Liberals.

Returns reaching the Dominion Bureau of Statistics indicate that in both exports and imports Canada's trade in 1935 was been greater than in 1934. Taking the actual figures for 11 months and estimates for December the total trade for 1935 was approximately \$1,200,000,000. Last year it was \$1,178,800,000.

Best for all your Baking

The Trade Agreement

Ahead of all that can be said at this juncture in support of the Canadian-United States trade agreement signed at Washington on Friday, Nov. 15, is that it is a step in the right direction and should be a prelude to further concessions in the interests of a free flow of trade and commerce between two great neighboring and friendly countries.

Both the former Canadian administration and the newly-elected Dominion government are deserving of commendation and congratulation for their respective shrewdness and foresight in entering into a pact to promote greater commercial intercourse between two states, geographically and ethnologically designed for close relationships.

Insular, however, as judgment can be pronounced on the tangible benefits to be derived by the citizens of the Western Canadian prairie provinces as a result of the agreement, that is a verdict which must await results demonstrable after the pact has been in operation for awhile, and perhaps, for some considerable time.

This is a statement which cannot be emphasized too strongly. For it must be borne in mind that the benefits of a reciprocal commercial agreement cannot be reaped immediately the gates are flung open; nor can the maximum exchange of commodities, for which concessions have been granted, be realized in the earlier stages of the operation of an agreement.

There are good reasons for this. The amount of the duty reductions involved is by no means the only factor which determines the quantity and value of the goods exchanged between the co-operating signatories. There must be an available supply to meet a demand at the time the demand requires it. The demand must exist to take care of the supply. Trade practices and seasonal exigencies are contingencies which have to be reckoned with. New financial arrangements have to be made when commodities are diverted into new channels of trade. Existing stocks may have to be liquidated. New methods of handling and shipping may be required.

Then, too, it should also be pointed out that a number of the commodities on which duties have been reduced under the agreement are subject to quota restrictions and these will have some bearing in limiting the quantity to be delivered.

There are only a few of the factors involved in the diversion of trade over new routes open in developing a trickle into a broad stream. There are others, and because of the Western Canadian producer being anxious to get his wares available before he is able to reap enhanced prices for the products he expects to sell in a new market and, by the same token, the consumer cannot be expected to be able to purchase overnight goods imported under a newly signed agreement at a great deal less than the price he has been accustomed to pay.

Unquestionably one of the most important concessions to Western Canadian agriculture is the reduction of the duty on live cattle exported to the United States. This is one of the items, however, on which a quota restriction is placed. The lowering of the duty will provide a needed outlet for a considerable number of cattle lot, on the other hand, many cattle raisers, who have been almost driven out of the business in the past two or three years on account of drought conditions, will not be in a position to take advantage of the new market for some time.

While Western Canadian consumers will undoubtedly benefit by reduction of tariff on a number of commodities importable from the U.S.A., it should not necessarily be assumed that the benefit will be immediate on all articles covered by the agreement or even, in some cases, to the full extent of the reduction in duty. For example, it has already been announced by the radio dealers' association in Winnipeg that the lowered duty on radios will not result in reduction of price to the Canadian purchaser because radios sold in this country are made in Canada "and are considerably cheaper than the American models plus duty."

These statements are not made with any intent to belittle the agreement, the efforts of the governments who have had a hand in the pact or the ultimate results which may ensue as a result of the insertion of the tariff cut of the wedge, but they are made in the hope that over-optimism as to immediate results will result in disappointment.

No matter what the operation of this first agreement may bring in the way of benefits to Western Canadian producers of exports and consumers of imports, the important thing is that it paves the way for further concessions and, it is to be hoped, in the not far distant future.

It might also be pointed out that there are some indications that the operation of this pioneer pact may prove to be more beneficial than the more cautious commentators anticipate. The daily press reported that eastern Canadian manufacturers are apprehensive and, on the other side of the international boundary a number of interests, fearful of the effects of new Canadian imports, are planning to lodge vigorous protests at Washington. It seems worth while to note the wind is blowing.

This would indicate that the new agreement may be pithead into the political arena in the United States and may be a cause behind the next national elections in that country, with what results remains to be seen. It is comforting to know that President Roosevelt has signed the bill. The agreement will double the trade between the two countries within a couple of years and it may reasonably be expected that he will defend his action rather than recede from the position he has taken.

Wheat Via Churchill

A total of 12,446,000 bushels of wheat has been exported from Western Canada by way of Churchill since 1921, the directors report, presented in Regina at the annual meeting of the Saskatchewan Wheat Pool. In the season just passed 2,407,000 bushels went out of the country via the Hudson Bay route, compared with a high mark of 4,050,000 bushels in 1924.

The sawpy lark sprays its enemies with a shower of acid.

Discontinued The Custom

Every Christmas from 1813 to 1921, the King of England was presented with a pair of wooden shoes baked in a pie. The custom was begun by Lord Talbot and continued by all viceroys and governors-general of Ireland. In 1921, Douglas Buckley, governor-general of the Irish Free State failed to send the traditional pastry.

Survival Of Old Days

The venison banquet, given to the Prince of Wales by the Mayor of Windsor, is a survival of the days when King John, in the hope of discouraging poaching in Windsor Forest, made a gift of venison to the whole town once a year. Successive Sovereigns have carried on the custom in various forms.

On leaving school, German girls are required to take a post as "mother's help" for a year before entering business. No pay except board and lodging is given during this period.

New Weather Predictor

Magnetometer Can Forecast Conditions Two Years Ahead

Reilly Maxwell, instructor in meteorology, who has been doing research work in a laboratory at Northwestern University, Evanston, Ill., has invented a "magnetometer" to aid him in his computations.

"You can predict the world's weather for two years in advance with the same ease that you might predict a storm for to-morrow," he asserted.

Last August, he said, he knew there would be a major storm in the northeastern United States in mid-November. In October he made 12 charts of the storm's course, and placed a blue print of the storm in the hands of navy weather men and his friends.

His new principle is based on the fact that the relative motions of the earth, moon and sun are irregular, resulting in a slight motion of the earth's whole mass.

"That causes the atmosphere, which is like a fluid, to slosh back and forth over the earth, just as water will slosh out of a pan if it is tilted," he said.

Maxwell predicted little snow this winter and another drought next summer.

Fashions A Telescope

Western Ontario Student Makes Himself An Efficient Instrument

A few pieces of sheet metal, some bits of a broken windshield, and a coil of wire, which a student of Western Ontario studies, can which the rings gaily spinning about Saturn, or the moons on their never-ending trail around Jupiter.

For 18 months, he devoted his spare hours to working on odd ends and, out of them, he fashioned, in no great expense, a telescope. Recently he showed his creation to his astronomical professor, Dr. H. R. Johnston, who described it as one of the most successful telescopes for amateur purposes he has seen.

Mr. Cole made the lens out of a piece of broken windshield, grinded it himself. For the telescope mirror, he invested in a piece of one-inch glass, but even in this case, he made it into a mirror himself.

Two pieces of sheet metal, rolled to resemble stove pipe, formed the base of the telescope. Abundant it he constructed his lenses and mirrors, his delicate instruments, all of which made out of wood, turned on his own lathe.

Royal Winter Fair

Alberta Is Heavy Winner In Cattle Class

Alberta came to fore at the Royal Winter Fair, when Charles Bell, of Calgary, exhibited the winner in the senior yearling division for bulls, Hereford feed cattle section. Exhibitors of Kendall Stock Co., Kew, Alta., and Frank Collicutt, Crossfield, Alta., were second and third, respectively.

Western entries also dominated the bull junior yearling class with first ribbon going to W. Crawford, Fred, Hanton, Alta., on Donald Steady Third. In second place was Hughes Bros., High River, Alta., with Winkertott Barndolph.

The Prince of Wales ranch of High River, Alta., with Bayton Orlor, was judged best in the bull, two years and under three class of the Shorthorn beef cattle section.

No Vaccination Marks

Just Swallow A Pill Is The New Method

The day when little Mary will vaccinate herself by gulping down a pill was visioned by Dr. Lloyd Arnold of the University of Illinois.

The vaccination mark will thus be done away with, the medical college professor told bacteriologists of Indiana, Michigan and Ohio. The pill, he said, will contain vaccine, or dead bacteria.

In order that this stuff may not be dosed by the gulping of pills, science plays a trick on the stomach, administering a bile pill thirty minutes before the vaccination pill is taken, he said.

As a result, the stomach remains quiet for one or two hours, and the vaccine passes on unchanged to small intestine, where it is absorbed into the blood stream.

Sounds Like It

A farmer once ate a country paper love: "I have an appetite now and I am lame to go to the mill I do." The paper was a love letter.

A New Ship Elevator

Will Be Capable Of Handling Vessels Of 11,000 Tons

A ship elevator is being constructed near Rothensee, Germany, about eight and a half miles north of Milwaukee, where the Milwaukee canal crosses the River Elbe by a large aqueduct.

The difference between the level of the water of the canal and of the river varies from about 31 feet at low tide to nearly 50 feet at low.

This new elevator will resemble the famous ship elevator at Niederlen in so far that it will be able to accommodate ships of 11,000 tons, but otherwise represents a different type of construction.

While the Niederlen elevator rises 210 feet above the water's surface, the new construction near Rothensee will be built deep in the ground. Instead of the water being raised, the ships being borne up and down on wire-gulches, here it will rest on two floats, each 50 to 60 feet, which are propelled by hydraulic pressure, and move up and down in shafts 210 feet deep.

The shafts, which have now been completed, stand over 150 feet apart and are each 33 feet thick with cast-iron interior walls, reinforced with concrete. Pillars 60 feet high carry the water through, and like the Niederlen elevator, the whole structure rests on an enormous concrete caisson.

Canadian Book Contest

\$2,000 To Be Awarded In Prizes For The Two Best Books

Announcement is made of a contest open to any Canadian citizen who is a resident of Canada (as of Sept. 18, 1935) and who feels they have the ability to write a fiction or non-fiction book in the English language of not less than 60,000 or more than 125,000 words. The contest closes June 1st, 1936, and the winning books will be published within six months after the prize is awarded.

Entrant judges have been chosen for the contest as follows: Dr. F. H. Edgar, National President, The Canadian Authors' Association; Mr. J. Morgan-Powell, Assistant Editor-in-Chief, The Montreal Daily Star; Mr. C. R. Sanderson, Deputy Chief Librarian, Toronto Public Library.

Application blanks for the contest and further details may be obtained from George J. McLeod, Limited, 266 King St. West, Toronto, Ontario, Secretary, The Canadian Authors' Association, P.O. Box 1424, Montreal, Quebec.

We hope that some of our readers will enter this contest, and wish them all success in their efforts.

Curious Old Laws

Smoking On Street Is Still Illegal In Britain

A recent freak court case at Hastings caused lawyers to search the statutes books and remind British that curious laws remain un repealed and could lead anyone to jail.

Still illegal in Britain are: Smoking a cigarette in the Sunday radio broadcast; Christmas dinner of three courses.

Making a mistake and "dollar" playing.

It is laws, if doctor, lique.

Just Swallow A Pill Is The New Method

The day when little Mary will vaccinate herself by gulping down a pill was visioned by Dr. Lloyd Arnold of the University of Illinois.

The vaccination mark will thus be done away with, the medical college professor told bacteriologists of Indiana, Michigan and Ohio. The pill, he said, will contain vaccine, or dead bacteria.

In order that this stuff may not be dosed by the gulping of pills, science plays a trick on the stomach, administering a bile pill thirty minutes before the vaccination pill is taken, he said.

In Primitive State

Says Indians Of James Bay Area Have Changed Little In Past Centuries

Despite three centuries of mission, war and other contacts with the white race, one group of Canadian Indians to-day was reported much the same as it was 1,000 years ago.

Dr. Truman Michelson, Smithsonian Institution ethnologist, found last summer that the James Bay Indians in the northern part of Ontario have changed their language, customs, folklore and mythology little during the past eight or 10 centuries.

He said they probably are nearer than any other Indians to the type of primitive Algonquians who peopled eastern North America long before the white man arrived.

Famed River Drying Up

Many Ships Stranded On Sand Banks In Blue Danube

The famous Danube river is drying up — as a result of drought unprecedented for this time of year. The Danube and Sava, which meander the walls of Belgrade, are now lower than for more than 50 years. In many places people can walk across them.

All navigation on the Sava has been abandoned and many ships stranded on sand banks. Danube only small boats, four feet high, can pass.

Big intemperance must not be regarded as sinister just because it is big, said Mr. Danvers, insurance official.

Teeship to the

Life Insurance

Companies Have A Mission To Perform That Is Vital To The Future

The Canadian Life Insurance Officers' Association is "the biggest of the big interests," but that is a reason for pride and not apology. Finance Minister Charles Dunning told members of the association at Toronto, Mr. Dunning spoke briefly.

Representing assets of \$2,000,000,000, and acting on behalf of 1,500,000 policy-holders life insurance men have a duty of trusteeship to perform that is vital to the future of Canada, Mr. Dunning asserted.

"There is scarcely a big interest in this country," he remarked, "that is not in reality an offshoot system of trusteeship. Without you, and the trusteeship of \$2,000,000,000 which you represent, Canada would be in a vastly different place than it is today."

Big intemperance must not be regarded as sinister just because it is big, said Mr. Danvers, insurance official.

Teeship to the

A New Star

Nova Hercules Is Exciting The Attention Of Scientists

Nova Hercules—the star that rose from oblivion to the season's celestial season last winter—has burst forth with the most direct evidence yet discovered in support of the theory that the universe is expanding. Its testimony was recorded by the 48-inch telescope at Yerkes Observatory of the University of Chicago and transmitted by Prof. George Van Biesbroeck, Observatory Director Dr. Otto Struve disclosed in an exclusive interview. The star was first observed in the western sky last December at a brilliant, opulent in the heavenly galaxy.

In July, it was found to have split into two parts. By nightly observations since then, Dr. Struve said, Professor Van Biesbroeck has determined that the two parts have been speeding away from each other at the rate of 300 miles a second.

These findings, the director explained, are evidence that the reason for Nova Hercules' sudden burst into prominence was that the star had burst, or erupted, throwing off two clouds of gas or nebulous matter, in opposite directions.

The Dangerous Driver

The Clever And Over-Confident Man At The Wheel Is Granted Blame

Who is a dangerous driver? The reckless? The man in a hurry? An insurance company's safety statistician, Mr. J. Russell Craig, does not attribute so many accidents to these half-shaded pests of the highway. He finds that most of the traffic casualties in his experience have been caused by the clever-driver who knows he is clever. The driver who put himself into a "cocked" (he says) and depends upon his cleverness and ability to get him out safely overlooks certain natural physical laws that no man—or his car—can avoid.

What are these laws? Clearly that two cars cannot occupy the space at the same time; also that a car's lifting power is quadrupled when its speed is doubled so that we need four times the braking power at sixty miles an hour that we need at thirty. The driver who is too confident of his ability to get himself out of any traffic tangle is likely, sooner or later, to run head-on into these natural laws. And when he does, tragedy is the result.—Calgary Albertan.

Rations For Dairy Cows

Experiments Show Home-Grown Feeds Are Most Economical

Two important factors must be considered in formulating suitable rations for dairy cows. The supply of food on hand, or available at a cost in keeping with the value of the product to be produced, and the selection of feeds that will supply the necessary food nutrients in a palatable form, plus sufficient variety and bulk.

Data secured at the Dominion Experimental Farm, Nappan, Nova Scotia, show that the cheapest supply of feed is secured from our own farms. In other words, home-grown feeds are the most economical.

It is generally recognized that on the majority of farms sufficient protein cannot be produced to supply the dairy cows with the necessary requirements. By producing clover or alfalfa hay, however, along with roots or ensilage and the common cereal crops, it has been demonstrated during the past three years that the only feed purchases necessary are small amounts of high protein supplements. One supplement that is produced in Eastern Canada is fish meal.

Experiments have been conducted during the last three winters, comparing feed made with linseed oil meal when used to balance a home-grown ration. It was found that equality as good production, at as low a cost, could be expected from a grain ration made up of 300 pounds ground oats and barley, or oats, wheat and barley, plus 50 pounds high protein fish meal, as when 125 pounds of linseed oil meal was used to replace the fish meal. In either case the ration contained slightly over 15 per cent. protein. Good quality hay and ensilage were fed as sources of roughage.

Strange Eastern Laws

Woman Photographed in A Bathing Costume Is Called A Sin

In Cairo it has been decided that it is a "sin" for a woman to be photographed in a bathing costume by any man—even by her husband. This decision was made by a "shari" court—one of the Cairo courts with authority to decide law suits involving religious cases. It has won warm approval from orthodox Moslems.

The case on which the judgment was given was one in which a Muslim woman sued her husband for hitting her head insulting her in public.

The court found, however, that the wife had committed "the offense" of defying in the "doctor friend," and was "fined" by a "sin" alone.

The court found, however, that the wife had committed "the offense" of defying in the "doctor friend," and was "fined" by a "sin" alone.

This happy informal picture was taken as the Duke and Duchess of Kent returned to their home at Belgrave Square, London, after the Duchess had taken her first outing since the birth of their baby prince.

Still Using Poor Seed

Large Number Of Farmers Are Sowing Inferior Grade

It is commonplace to say that good seed is an essential in the production of a good crop, stated Professor Robert Sumner, of Macdonald College, in his presidential address to the Canadian Seed Growers' Association. But while there is very general agreement on this, there are still many farmers who do not put this apparently accepted principle into practice.

Examination of the seeds and of the seed which is being used in seed drills in different parts of the country reveals the fact that a large proportion of farmers are still using seed of a poor grade, either of unknown variety or of badly mixed varieties. Similarly an analysis of the grain that is being delivered to the elevators shows that far too many farmers are using non-certified seed, and only a relatively small proportion are using seed of the highest quality of the most suitable varieties.

To drive home to farmers in general the importance of the use of good seed in an agricultural program requires that a continuous, persistent, educational program be carried on year after year.

Horse Jumping Exhibition

French Horse Wins Out At Royal Winter Fair

Ten jumps up a difficult figure that course proved too much for 57 tied, high-bred military horses at Royal Winter Fair.

Only two of that number were to clear the hurdles without a fall, and even they were unable to perform in a jump-off at place.

The jump-off event of the fair was won by a French horse, which cleared the hurdles for eight jumps, French horse, carrying one knockdown, for four.

Clifford Riffon Memorial team of three of three hunters, finally went to Mrs. Riffon, of Winnipeg.

The court found, however, that the wife had committed "the offense" of defying in the "doctor friend," and was "fined" by a "sin" alone.

The court found, however, that the wife had committed "the offense" of defying in the "doctor friend," and was "fined" by a "sin" alone.

DUCHESS OF KENT HAS FIRST OUTING

Efficient And Economical

Discover A Pungent Parasite Believed Some That Ravages Fiji

A possible menace to Trinidad's profitable and expanding banana industry was seen with the discovery of a fungus parasite, described as the dreaded cercospora musa, which time and again has ravaged plantations in Fiji, Queensland and Surinam.

Colonial Mycologist F. Pitt in a report to the department of agriculture stated that Glad Governor, Governor, G. M. Michel, Surinam, and numerous other plantations throughout this colony are affected at present. Mr. Pitt believes Trinidad's climate may be a strong ally in the battle against the newly-discovered ravager, and he recommended the strengthening of banana plants by increasing the use of fertilizer.

New Source For Gasoline

Extraction From Cotton Seeds Claimed By Chinese Scientists

Chinese scientists claim to have perfected a method of extracting gasoline, kerosene and lubricating oils from cotton seeds.

The Kiangnan Hsu Company, operating in Nanking, has made test runs with the new gasoline and pronounced it satisfactory and economical.

A large shipment of cotton seeds has been ordered for further tests by the National Central University laboratories which analyzed in the experiments.

China, imports all her gasoline, which sells in Nanking for 80 cents a gallon, equivalent to 30 cents in Canadian money.

Queen Elizabeth was an enthusiastic book collector. She had her picture engraved on both covers of all her books, and actual jewels were used to decorate her crown in the pictures.

Rest is nothing but rest if you take more than 4,700 miles of thread.

The man most anxious for credit is least likely to deserve it.

Peanuts have been cultivated in China for 2,000 years.

The court found, however, that the wife had committed "the offense" of defying in the "doctor friend," and was "fined" by a "sin" alone.

The court found, however, that the wife had committed "the offense" of defying in the "doctor friend," and was "fined" by a "sin" alone.

Plant Comfort

Care Of Perennials And Shrubs In The Winter Months

The plant inhabitants of prairie garden plantations are to a large extent selected immigrants from gentler climates. They are accustomed to more moisture, less extremes in temperature, and in many cases to less hard frosts and to less heat in breezes. Being aware of this, the Dominion Experimental Station at Morden, Manitoba, finds the following treatments to be advisable.

In dry autumn it is helpful to water generously all fruits and ornamental plants prior to frost-coming. Unfortunately the Morden station is unable to irrigate but those who have facilities may well employ water this season.

Shrub vines are placed on trees subject to winds. Apple trees are partially covered from March and April on by tacking a board to the south-western side of the exposed trunk or by wrapping with paper, burlap, or metal lath. Arbutus bushes are furnished with brush or straw.

Dry roots are a first precaution for many subjects and waterways are made for the tree fruits, roses, and the rock garden.

Plants require winter protection. However, it is not applied until they are nearly frozen in their beds in November. Adding an outer covering then prevents alternate, abrupt frosts and thaws which are so daily ruinous to a large number of plants in late winter and earliest spring.

The end frame is covered with leaves, moss or clean straw. State over this are further help. Tender roses are mulched with dry leaves to a foot high and it is well to fill the hollow between covers of earth with straw. The rock garden is covered with straw held in place with brush. Tulips and other bulbs are laden with the six inches of straw mulch. Newly set peonies should have covering, four to six inches of seedling straw in the favorite mulch for all herbaceous perennial beds including roses, peonies, delphinium, campanula, and general flower borders. Lilies do well with a foot of dry leaves but straw is also satisfactory. Where leaves are employed, those of varieties such as which do not mat tightly, are preferred.

In the small fruit plantations, four inches of wheat straw or slough hay or evergreen boughs or corn stalks are placed over the frozen strawberry patch. Tender blackberries and raspberries may be soil weighted. Currant and gooseberry bushes profit from heavy applications of manure. Grapes are ground and straw stalks buried under eight to twelve inches of soil before the earth is much frozen.

The lawn has brush scattered in the wind rows to trap snow and thus retain and retain snow which is the optimum of all blankets, before Nature's own.

In supplying comfort to plants for the winter, a first thought is to select snowfall and thus bring to the plants the comfort found by the plants in the snow. As that splendid hind plunges into the snowdrift, it is there during the depth of winter. Hat fences, straw windows, brush piles, or snow fences will assist in halting drifting snow and induce it to settle in the swirling eddy in the lee of the shelter.

A Social Blunder

Manchester Man Will Now Study Canada's Idiomatic Expressions

Sydney Gibbins, Manchester cotton official, sailed from Montreal for home aboard the liner Anania with sad remembrance of his only social blunder during the Canadian visit and a promise to study the country's idiomatic expressions before returning.

"I told a man after a pleasant evening that he had a very homely wife and we almost came to blows," he said ruefully. "You know, homely" in England means homely, but I soon found out what it meant in Canada."

Increased Car Sales

More Motor Vehicles Sold In October Than In September

The Dominion bureau of statistics reported that October sales of motor vehicles were more than 1,500 more than those of September, an increase not noted in any autumn since the bureau started keeping such records in 1922.

Sales in October were 3,611 vehicles, worth \$4,169,017, compared with 2,067, worth \$2,684,709 in October, 1924.

The first Methodist church in the United States was established near Westminster, Md.

GEORGE DELIGHTED WITH ENGLISH CLIMATE—DECIDE TO STAY

Part of the flock of several hundred Canadian black-necked geese, long lake in Rockham Park, the North Norfolk coast of the East of several years ago. These beautiful creatures are perfectly satisfied with the wild "pink feet" geese which frequent the local lot of "wild" British birds.

WORRIED ABOUT YOUR HEALTH?

TAKE SASKAL

Nature gives to Canada its magnificent mountains, the natural mineral salts found in Little Marston. These medicinal salts are refined and prepared by expert Chemists in the form of SASKAL, SALTS.

This SASKAL is now given to Canadians in simple form—easy and pleasant to take—the most powerful purifying, medicinal products of SASKAL. It is the simplest form of SASKAL. It is helpful to you in regaining your lost health and maintaining it in perfect form. If you suffer from Constipation, Indigestion, Rheumatism, mild Kidney or Liver troubles—take SASKAL, SALTS. At all Drug Stores—40c

WORLD HAPPENINGS BRIEFLY TOLD

Emperor Haile Selassie ordered a chieftain of the Jijiga region flogged for cowardice in battle. The troops under his command and his property was turned over to another Ethiopian commander.

A 50 per cent. reduction in the rate for long distance telephone calls is announced by the Manitoba telephone system. Effective Jan. 1, the reduced rates apply throughout the province.

Rear-Admiral Carey T. Grayson, head of the United States Red Cross, said Japan has sent enough surplus materials to the International Red Cross to care for 10,000 Ethiopian wounded.

Drastic overhaul of Britain's shipping regulations is in sight. The evidence gathered by the board of trade inquiries conducted last at growing toll of British ships lost at sea is creating wide uneasiness.

The successful finish of the world's largest piece of glass, the 100-inch mirror or "eye" of the world's largest telescope, was revealed at the Corning glass works. This huge telescope mirror was poured Dec. 3, 1934 and has been cooling ever since.

Elimination of the Alberta debt adjustment legislation and the whole subject brought within the jurisdiction of Dominion legislation was urged in a resolution sent to federal authorities by the Calgary Board of Trade.

The Irish Transatlantic Corporation decided to press for the appointment of a select committee of the House of Commons to inquire into an alleged attempt to create a monopoly of the North Atlantic air route for the benefit of certain interests to the exclusion of other companies.

Mounties Study Law

The Mounties studying course at Universities in Canada.

The famed Royal Canadian Mounted Police Force which hasn't many "mounties" members today, is striking out in a new direction with the purpose of increasing its efficiency "to always get their man."

In conjunction with a new move instituted by Commissioner Sir James MacBrien, drill instructor H. Pershon is attending law school at the University of Alberta, one of five members taking such a course.

Another who qualified for this special training is Lance Corporal James MacBrien, drill instructor of the Saint John detachment and son of the commissioner.

It is understood a "mountie" is attending law lectures at each of the following places: Dalhousie University, Halifax; University of New Brunswick, Saint John; McGill University, Montreal; University of Saskatchewan, Saskatoon; and University of Alberta, Edmonton.

Carrying Out Contract

Model Of Chinese Being Sent To Native Land

A contract with the dead, assuring their peaceful rest by the side of their honorable ancestors in far away China, was on its way to fulfillment. In Mount Auburn cemetery of Richway at Chicago, diggers were exhuming the bodies of 400 Orientals under direction of the Chinese Consolidated Benevolent Association. During their lifetime it had pledged, on condition of payment of a stipulated fee that it would insure their final interment in the land of their fathers and in the sepulchres of their families.

The pouch of the full-grown pelican is capable of holding seven quarts of water.

VICKS COUGH DROP

Murder Among Birds

Curator Tells Of Many Tragedies He Has Seen

"Birds often murder each other," according to P. A. Traverser, curator of birds at the National Museum, Ottawa, a delegate at the convention of the American Ornithologists' Union. "It's not always the big birds that kill the little birds. Birds will tackle others of their own species, just like humans."

During his ramble while studying birds Mr. Traverser has several times come upon the remains of murdered birds, and often seen the deed committed. There are even murder mysteries, he says.

A case of wanted murder occurred in a long-bill gullery on a small stone island near the north end of Lake Winnipeg. Young gulls of all ages were hiding between bushes and under weeds while a few of the older ones were paddling in the water off shore. The adults had taken to wing and circled in great excitement over a nearby lake. One of the large birds, which it winged by, took what seemed to be a casual puff at one of the birds swimming. The young bird was distressed and as if its disorganized struggles were a signal, a considerable portion of the adults turned over to the unfortunate bird and in a few moments only a few drifting feathers were seen to float in the water.

Another time Mr. Traverser saw a small hawk that had dared to fly through a flock of gulls, glide down to the water, and the whole flock on top of it, leaving only a little blotch of brown seen. A red-tailed hawk has been found to the death on Point Pelee, and another clear case of murder occurred in a gully in the St. Lawrence, when a young gull wandered out of its territory and was killed with one stroke of the heavy bill of another gull.

Cousin Pay Visit

Buffalo Resident Comes To Canada

To Great Love Frederick, four decades ago, William Buchan Reid of Buffalo, who used to go to school in Scotland with a young cousin, John Buchan, whom he regarded as a dreamer, crossed the border on his way to Ottawa to see, for the first time in 40 years, the young dreamer, now Lord Tweedsmuir and governor-general of Canada.

The cousins had now seen another Alexander Buchan, Scotland, four decades ago. William Reid is four years older than the governor-general.

"John was brought up in a manse and I on a farm," Mr. Reid said. "I had, we went to the same boarding school together. I was not surprised when he had become a writer, for he was always a bookworm. But when he was surprised when they elected him to the house of commons. But when he became governor-general of Canada, I thought it was about time to look him up again."

Delicious Crisp Cookies

This Recipe Proves They Are Easy To Make

Temperature: 400 degrees F.
Time: 10 minutes.
2 squares unsweetened chocolate
1 cup shortening
1 cup sugar
1 cup "Crown Brand" Corn Syrup
2 eggs, unbeaten
1 cup flour
1 cup Benson's Corn Starch
1 teaspoon vanilla
1 cup finely chopped nuts

Method: Melt the chocolate in the top of a double boiler. Remove from heat and add the shortening, sugar, "Crown Brand" Corn Syrup, eggs, sugar, Benson's Corn Starch and vanilla, beating the whole mixture thoroughly, being sure the eggs are added one at a time. Spread the mixture on baking sheets which have been oiled with Maida. Sprinkle with nuts and bake in a hot oven. Cut while warm. These cookies are very crisp and easily made.

Substitute For Explosives

Compressed Air Used For Blasting Coal In Mines

A blast of compressed air is being used for blasting coal from seams in some Illinois and Indiana mines, instead of explosives. Heavy steel cylinders charged with air at a pressure up to 35,000 pounds to the square inch are inserted in drill holes. The air is released through a valve operated by remote control. The coal is pushed out of the seam in larger lumps than when blasted and is therefore more valuable. The greatest safety for the miners is the prime factor.—New York Herald Tribune.

Americans are said to purchase \$30,000,000 worth of fraudulent stocks each week. 2127

PROMINENT IN AUSTRIAN POLITICS

Above are two personalities in the new Austrian cabinet which was changed after the recent Putsch coup by Prince von Starhemberg. Left is Dr. Ludwig Brandler, Minister of Finance, and right, Major Eduard Beer von Baranof, new Minister for the Interior and Security.

New Census Of Stars

Discloses Number, Size Of Sun, Not Previously Identified

An astronomer star census by a new method reported to the National Academy of Sciences at Charlottesville, Va., increases the theoretical mathematical chances of life like that on earth existing elsewhere in the universe.

This report does not discuss the possibilities of life, but shows a larger number of stars the size of our sun than previously identified. His star census fits directly into the statistics by which astronomers have been estimating the chances that there might be other suns with planet families and evolution just like ours.

Such an "accident" was once considered remote. Lately the almost incredible multiplication in the estimated number of stars has caused astronomers to consider the "accident" of exact similarity more possible, and the course shows the existence of an increased number of specific places where there might be duplication.

The star count was made on "dwarf" and "giant" stars by P. Van de Kamp and A. N. Vysotsky of the Lick and McCormick observatory, University of Virginia.

Forgotten Fortunes

British National Debt Commission Holding Sum Totalling \$100,000,000

Forgotten fortunes being held by the British National Debt Commissioners now total nearly \$20,000,000 according to an announcement in London. The sum represents the value of British Government securities and their accumulated dividends which have never been claimed by the original purchasers. One of these holdings in Canada is worth nearly \$1,000,000. No one has ever attempted to claim it. An English holding in Mexico, France, did not even know that she possessed a fortune amounting to \$200,000 with accumulated dividends totalling nearly \$100,000. For years she had lived by borrowing or begging from relatives or neighbors. "It is difficult to give the full details of the overlooking of what in many cases are substantial fortunes," an official of the National Debt Commissioners said.

Knit and Pur Your Way to Style

The dressy type of sweater is important for every sort of suit one for yourself—you in this day! This new costume and pleats. The interesting shirt and you will have an wardrobe for you.

In pattern 5484 you will see plain skirt in sizes 16-18 and 20-6 stitches used material required. To obtain this pattern send 20 to Household Arts Dept., Winnipeg, E. Winnipeg.

Amenities Of The Road

Lack Of Courtesy Of The Man Behind The Wheel

The question of the courtesy and temperance of motor drivers has come to the fore of late through the suggestion of a weekly-circled magazine that the automobile is the ruin of the temper.

Consideration of this phase of the subject leaves the impression that there is something in the mere act of driving a car which causes one to forget all, or nearly all, the common requirements of courtesy.

Recently we had cause to comment on the fact that few Canadian drivers will give their headlights to an approaching car, even when requested to do so by repeated action of the other driver in a dimming the lights. It is truly amazing how our dispositions suffer when we are behind the wheel of a motor car. We feel aggrieved at the driver who tries to pass us, and speed away in a cloud of dust. We try to cut in ahead of the other fellow, we demand our share of the road and probably a little more, and we probably consider the other driver, always in the wrong.

We suggest that motorists give honest consideration to this subject, make up a list of just how you feel towards the other driver on various occasions; you will likely be greatly surprised to learn that you lack courtesy when behind the wheel of your car.

The restoration of courtesy in driving, friendly, willing courtesy, could well be the first step in a Canadian-wide safety campaign. Let us think courteous and follow through with action.—St. Catharines Standard.

Tomb Among Buddhists

U.S. Scientist Will Be Buried In Chinese Monastery

Alan Priest, curator of the Oriental department of the Metropolitan Museum has a newly completed tomb waiting for him in the Buddhist monastery of Chien Tai Sui, or the monastery of the Oblivious Terence.

The religious structure, 25 miles from Peking, dates back to the third century A.D. In the communal graveyard, dating back to the Ming dynasty, Mr. Priest has his tomb. It is the typical Buddhist form of shaped, gray bricks, rising ten feet and looking not unlike a cross de maitre before it is overshadowed by a great pagoda and other shrines 600 years old. Giant evergreen trees equally ancient give shade.

At present the plaque on the tomb merely carries the date of erection in Chinese characters, but it might some day include the character "Fu," Mr. Priest's name in Chinese.

In order to receive this special favor of resting in death among the monks, the American made friends with the chief abbot of Chien Tai Sui, and in a minor way is considered one of his followers. Mr. Priest, after graduation from Harvard, participated in an archaeological expedition to China, speaks and reads Chinese, and is one of America's leading sinologists. He put the finishing touches to a book manuscript on Chinese subjects while on leave in Peking.

2 Things to Do TO EASE COLD INSTANTLY

Discomfort and Ache Go Almost Instantly This Way

1. Take two "Aspirin" Tablets. Make sure you get "Aspirin".

2. Drink a full glass of water. Repeat treatment in 2 hours.

Instead of taxing your system with strong stimulants for a cold, try the way pictured above — the modern easy way. Your own doctor will approve it. And it takes hold at once. A hot cold almost immediately. The "Aspirin" you take will start combating your cold internally, at once; it throbs, it aches, and it's "Aspirin" Tablets in a flash.

DEMAND AND GET **"ASPIRIN"**

FLEMING'S FOLLY

— BY — LAWRENCE A. KEATING

CHAPTER I.

Chill with promise of approaching winter, a low morning, nighting wind, down from the moon peaked Captain Mountain twenty miles west to devils-dance with macabre glee in the wide main street of the town of Havelock.

Blackhead teams and saddle horses lined the juniper hitches before San Pickett's General Store, the false-fronted Half Moon Saloon, and the three-story Trullied Hotel across the street. With cars parked and muzzles lowered between their knees, roan, mustangs, and bronks huddled together in morose resignation to the elfing and nip of dust-cold that now and then all but hid them from view.

Through broad, hazy windows of the hotel lobby could be seen the meeting of Boone County cattlemen, called by the owner of the modest Star Loop Ranch, Link Fleming, feverish attendance.

Every pre-attendant countenance was etched in lines of gravity, every ear attuned to the earnest words of the twenty-three year old speaker in cowhide vest and work trousers who with somber head on his high

Growls and nods proved the body of ranchers in hearty accord. "Ah! no city gent gonna tell me where to feed my cows!" threatened rethundered Burr Colgan.

"What's the gov'ment got to say about this, anyhow?" another man demanded.

"Anybody tried to stop up from summer?" in them footbills, he plumb liable to get his neck stretched on the handiest blue pine!" loudly declared Oop Vaila.

"Boys," Link put in, "I don't like this interference any better than you do. But I won't solve our problems to hang anyone, or put up a gunfight. Down at Ox Draw they held a necktie party with a government man for the honored guest. The result was a regular small-time war, with seven killed, cattle run off, and a dozen ranchers and waddies jailed. The government won. Ox Draw cattle stayed out of the footbills last summer, didn't they?"

"That's right." As everyone looked his way Otto Pieper, the scrawny beaked president of the Stockmen's Bank, smiled. He passed a boy hand under his shining bald head, as if to warn of the hair that had been shaved, and caused his Adams' apple to bob up and down in nervous preparation for further speech.

"I'd be suicide," he quavered. "Kill ten agents and 50 maddlers! Come. Hang the lot of 'em and five hundred'll be here next day. No, sir!" Otto declared with emphasis. "This government order means what it says. It's dead right about everything fair on for the American people, uh, striped as so fearless series of ranchers sums of money, he Bank exist- to him. ned. as k

He was the most influential citizen of Boone County, and Link had come to suspect the real power behind local affairs. He was virtually county boss, a con, jealous of his prestige and ruling with an iron fist. The man who dared interfere with or oppose Pieper was doomed to defeat. There were whispered stories almost become legend, of certain persons he had marked with his wrath, and the series of misfortunes which came their way after that. More than one small-rancher finally had sold out for a pitiful sum, his acres and stores coming part of the Box 507 while man himself hurriedly sought safety from his boots.

By. "I'm for faster out, in case first, got to be a good thing. Especially 'cause like Pieper told us, boys, we can't fight the whole U.S. Army. Let's hear what Link's got to say!" he went on in a persuasive tone. "I never thought much about water, or don't back, but Fleming's talked it a long time, and I reckon he's gone into it plumb thorough. Tells me he got Sink Trower to draw up plans for a scheme to irrigate the whole valley. I'm with you gent on whatever's decided, but this greater order means business, so we ought to look into the water question."

Link felt a thrill of relief as the words brought instant pause. He had begun to fear from Pieper's silence that he was falling him. No particular friends, this was one of the rare occasions on which they found themselves working in harmony. Fleming had ridden to the Box 50 yesterday to his irrigation scheme.

Like most other ranchers, he had always scoffed. But the grasping order seemed to make him willing to reconsider, for he owned the largest herd of beef cattle in Boone County.

"Tell yuh, Link," Pieper had declared after the visitor outlined his purpose, "I'll do what I can to have the boys think it over. Can't promise they'll back it, but I guess we're all willin' to be shown."

This was indeed a concession, and it roused hope in the Star Loop owner. "That's all I ask," he grinned eagerly. "If yuh'll help get the men in a receptive frame of mind I'll explain to them. If they reject it we haven't lost anything. And if they go in for it this country will be a changed place!"

Kilgo had studied his visitor shrewdly. "Then yuh don't think irrigation is just a crazy, newfangled idea?"

"Not at all. It'll not only save us from ruin, but it will make every spread more prosperous than ever before. Your place can benefit plenty!" "Well, I'm always open-minded to a good thing. I'll get yuh a hearin', Link. Hecken if Pieper Kilgo says 'Boys, listen to this,' they'll listen, too."

It was true enough. He was the most influential citizen of Boone County, and Link had come to suspect the real power behind local affairs. He was virtually county boss, a con, jealous of his prestige and ruling with an iron fist. The man who dared interfere with or oppose Pieper was doomed to defeat. There were whispered stories almost become legend, of certain persons he had marked with his wrath, and the series of misfortunes which came their way after that. He was the most influential citizen of Boone County, and Link had come to suspect the real power behind local affairs. He was virtually county boss, a con, jealous of his prestige and ruling with an iron fist. The man who dared interfere with or oppose Pieper was doomed to defeat. There were whispered stories almost become legend, of certain persons he had marked with his wrath, and the series of misfortunes which came their way after that. More than one small-rancher finally had sold out for a pitiful sum, his acres and stores coming part of the Box 507 while man himself hurriedly sought safety from his boots.

He heard of again. He defied analysis: a strange combination of personal and impersonal sums of money, he Bank exist- to him. ned. as k

Still Holds Public Interest

News About Little Prince Of Kent Is Eagerly Read

The recently born Prince of Kent, who may some day sit upon the mighty throne of England, is competing these days most successfully with war news and what the Prince of Wales says.

The most minute details of how the baby son of the Duke and Duchess of Kent is progressing are devoured by the British public.

In drawing room, banquet hall and "pub" there is a new toast in vogue—"To the new prince."

He is the fifth grandchild and the third grandson of the King and Queen, and will have the title of royal highness. Since 1917, this title has been confined to the issue of any British sovereign and to the issue of the son of the sovereign.

The little Prince is related to half of Europe. In his veins flows German blood from his grandmother, who was a Princess of Teck, and from the King, grandson of Albert, the Good of Saxa Coburg-Gotha. The royal baby is also related to Russian, Danish and Rumanian royalty.

A new coat of arms must be chosen for the highborn baby. The College of Arms will design it, and it must be approved by the King.

Ex-Prisoner Makes Good

Studies Advertising And Builds Up An Envious Business

Years spent behind the grim walls of Ohio penitentiary showed Daniel Boggs, now only 31 years of age, the way to earn an honest fortune.

Since he was released from the penal institution less than a year ago through executive clemency, Boggs has built up an enviable advertising business and now has three offices. He is earning more money than he did while in prison.

During his sentence in the penitentiary Boggs studied advertising and became an advertiser's writer. He earned money to provide financial aid to his aged mother and four sisters. They depended on him before he was "taken away."

He won the admiration of advertising men in Columbia, O., by his aptitude for copy-writing ability and while behind the walls he built a thriving mail order business.

Upon his release he was offered a job in Cincinnati at \$75 a week. He declined the offer and remained here to establish his own concern.

Boggs is leading a glorious trail along the "come-back" path and as a doctor to business firms he is proving quite successful.

Famous Paintings For Rent

University Trying To Foster Deeper Appreciation For Art

Hall bedrooms that never saw any better art than movie stars' pictures, will soon be blossoming out with colored reproductions of famous paintings, if Prof. Lester Longman's plan goes through. The professor is head of the fine arts department of McMaster University, and has hit on the idea of renting out the collection of art works for 10 cents for two weeks.

"The 10 cents fee is really a guarantee of interest," the professor told The Herald. "It will mean that the students won't just drag the pictures home, put them aside and pay no more attention to them. I feel that the time will be a sort of premium, and I think that a deeper appreciation of art will be fostered this way."

At present the pictures are on exhibition at the university. There are 150 framed and ready to be read. The collection contains pictures of the 17th and 18th century masters, as well as some modern artists and impressionists. Among the older pictures are Gainsborough's "Portrait of Graham," Lawrence's "Portrait of a Girl," and Gilbert Stuart's "Portrait of Washington."

There are no Canadian reproductions, because the work of Canadian artists is not reproduced in such proportions. There are English, French, Italian and one or two Spanish pictures.

The idea of renting pictures originated two years ago with a friend of the professor at Brown University in the United States.

Britain's Defence Plans

Country Obedient To Bring Forces Up For Safety

Britain proposes to spend one billion dollars at once in building up the navy and the air force until these are as strong as the land. Britain is not in a chance, she is not going to trust plus hopes any longer. If trouble comes, she is going to be prepared for it. Might has again taken the place of right as a solution for international troubles.

As preparations for war can stop at war, Britain is going to be ready to do the stopping.

This is a tragic situation to develop so soon after the great world war. Britain, however, is blameless for it. She disarmed, while others were arming. She cut down her defence forces to a dangerous low level, as an example to other nations, an example which they refused to follow.

Under these circumstances, it is not to be wondered at that realism has taken the place of idealism in Britain's defence plans.—Oshawa Times

Raising Gigantic Toads

To Be Used To Curb Increase Of White Gnat

An "army" of gigantic toads is being bred at the Meritana sugar experimental station in North Queensland, Australia. In due course they will be flung into action against a certain kind of crop-destroying white gnat. Originally, 100 of these toads were imported from Hawaii. Now there are 2,000 of them and the number is increasing rapidly. It is said to be the first time that such creatures have been bred in captivity.

Canada-India Trade

Bright prospects for increasing trade between Canada and India through direct steamship service between the two countries were seen by Major J. G. Parmelee, deputy minister of trade and commerce for Canada. Major Parmelee assured exporters and importers doing business with India full co-operation from the department of trade and commerce.

Mother's Guide to Better

CONTROL OF COLDS

For Fewer Colds..

Vicks VapoRub helps Prevent many Colds

At the first warning signs of nasal irritation, quick—a few drops of Vicks VapoRub up your nostrils. Especially designed for nose and throat, where most colds start, Vicks VapoRub helps to break many colds—and to throw off head colds in their early stages.

Follow Vicks Plan for Better Control of Colds

A helpful guide to four colds and their cures. Developed by Vicks Chemicals and Medical Staff, tested in extensive clinics by practicing physicians—further proved in everyday home use by millions. The Plan is fully explained in each Vicks package.

Madame Grand De Rouen, of

Quebec, militant suffragette in

the only part of the British Em-
 pire which still withholds thefranchise from women. In truth,
 amazingly enough, but when seen

in action leaves no doubt about

her milk & honey skin and the

kind of eyes they write songs

about in Ireland. Speaks French like

Artistic. Brilliant. Cam-
 ouflaged for

1918. Thinks Premier Louis A.

Bourgeois will grant them right

after she grows class and the

Premier gives away his two sharp

eyes. His gone to Parliament

for eleven successive years lobby-
 ing, wheedling, coaxing, pleading

and threatening members to vote

for female suffrage but hasn't

got to first base yet. After three

years persisting a woman in-
 troduced the first bill. Then

Premier Bourgeois refused to

call it. To wear his down

Madame De Rouen sat in the

gallery and stared steadily at the

Premier every afternoon for eight

weeks. In a fury the Premier

called the bill, tore it into tatters

and declared it. Believes in the

words: "He travels fastest who

travels alone" and belongs to no

clubs, leagues, associations or

groups

Mr. and Mrs. C. Ambury
 spent the holiday season in Cal-
 gary the guests of Mrs. Am-
 bury's parents.

Mr. A. Dubau of the Lake
 Valley district, is having an
 electric plant installed on his
 farm to supply light and power
 for the house and buildings.

Mrs. H. Tanner, who was un-
 dergoing treatment in the hos-
 pital, returned home last week
 as is now much improved in
 health.

Mrs. Hicks left last Tuesday
 for Three Hills where she will
 spend the week with her
 daughter Mrs. Mac Millard who
 has recently given birth to a
 baby girl.

Mr. and Mrs. A. Stratten cel-
 ebrated their wedding anniver-
 sary on New Year's Eve. Dur-
 ing the evening a number of
 friends called to help celebrate
 the occasion, and a most en-
 joyable evening was spent.

While on their way to town
 to open New Year's day with
 friends here Mrs. Middleton and
 family had trouble with their
 car and were unable to get here.
 They spent the day at the home
 of D. Williamson and family.

Mr. J. R. Reid of Tompkins
 spent the festive holidays here
 with his daughter Mrs. E. L.
 Stone and Mr. Stone.

Mr. S. Schneider and child-
 ren are at present visiting
 friends at Schuler for the week
 end.

Mr. Chris Sair, of the Lake
 Valley district returned home
 last Monday after undergoing
 an operation in the hospital.

Miss Alice Todd, of Brooks,
 spent the Christmas holidays
 here with her parents. Mr. and
 Mrs. T. Todd.

Mr. T. Jensen, who has been
 attending the Technical School
 at Calgary, is spending the festi-
 ve season with friends here.

Mr. J. Allenback is now nicely
 recovering from a severe attack
 of pneumonia, which has con-
 fined him to his bed for some
 time.

"Margaret Cann accompani-
 ed by Muriel Hitchen, are spend-
 ing the holiday season in Me-
 dicine Hat the guests of the
 former's grandmother, Mrs. Bas-
 sett.

Mr. L. Holston, formerly su-
 perintendent of the Dominion
 Glass plant here, arrived in
 town this week on business in
 connection with the plant here.
 While in town he is the guest of
 Mr. and Mrs. R. S. Hodge
